TRAFFIC MONITORING CENTRE

TICKETING CENTRE

INFORMATION SERVICE CENTRE
Traffic monitoring

- The regional Traffic Operations Centre is one of the most advanced in Europe:
  - more than **34,000** km of monitored roads
  - **80 traffic sensors** installed in the regional territory
  - **Floating Car Data (FCD)**
  - **Regional Supervisor** for traffic estimation and provisions, both on-line and off-line
Regional ticketing

- 5T designed and currently coordinates the e-ticketing system of the Piemonte Region («BIP System»), operating the technological infrastructure

- BIP System: **full contactless regional e-ticketing system**, operational in Torino and in the most part of Piemonte, involving 5 public transport areas, road and railway services, and 1.000.000+ users

- 5T operates the **Regional BIP Centre**, in charge for assuring security, regional interoperability, independent public governance, monitoring and control of Public Transport and services for citizens
